Web Conference Integration Guide for larger rooms

Q-SYS Ecosystem

Audio | Video | Control | Processing | Networking | Integration | Monitoring

QSC
• Zoom Rooms integration - User control interface template replicates the official Zoom Room GUI. However, it is fully customizable for needs of the room / branding of the organization
• Integrated network video streaming without the need for additional control processors or complicated programming
• NV Series (as decoder) allows for simultaneous streaming of network or BYOD (laptop) sources to dual-monitors

• Multiple PTZ conferencing cameras without the need for a dedicated video switcher
• Enterprise connectivity for fault monitoring and usage analytics
• Standards-based networking for IT-friendly deployment
• Zoom soft codec integration via USB connection on Q-SYS NV Series
• Fully integrated network video streaming without the need for additional control processors or complicated programming

• Multiple PTZ conferencing cameras without the need for a dedicated video switcher
• Enterprise connectivity for fault monitoring and usage analytics
• Standards-based networking for IT-friendly deployment
Hangout Meets - large meeting room
