

## Our Company

For over 50 years, QSC has developed the technology and solutions that power immersive cinema, live performance audio, themed entertainment experiences, and digital collaboration and meeting experiences across the globe. A globally recognized innovator in the design, engineering and manufacture of category leading high-performance loudspeakers, digital mixers, power amplifiers, audio processors, digital cinema solutions, and the Q-SYS™ software-based audio, video and control ecosystem, QSC thrives where enabling technology and audio-visual experiences intersect. We've earned the trust of our customers and partners worldwide with our award winning sales, service, and support teams, and always delivering high performance, highly reliable, scalable and flexible solutions for professional installed audio, portable, live sound, production, corporate and cinema applications around the world.

## An Innovative Future

QSC is composed of teams cohesively working together across a broad portfolio of technologies to create a whole that is greater than the sum of its parts. We encourage employees to take ownership, to color outside the lines and think outside their comfort zone. From hardware to software, from design to installation, QSC creates products and technologies that change markets through informed risk-taking, supportive collaboration, and a passion for quality, performance and delighting customers. We are continuing to innovate new standards for delivering sophisticated digital audio, video, and control solutions that elevate customer experiences, add more value for our partners, and create new opportunities for our employees.
