

Solutions Overview Guide

Meeting Space Solution: Boardroom

Scale the Google Meet experience to your Boardroom to provide a consistent user experience for every participant. QSC solutions for Google Meet provide the right AV infrastructure (Q-SYS) the right products (Q-SYS network cameras and USB endpoints, QSC amplifiers and loudspeakers) along with featured Q-SYS Partner products (microphones, displays, etc.) to enable your high-value spaces.

- The Q-SYS Platform is certified for Google Meet and scales the familiar Google user experience into high-value spaces.
- Fully networked and manageable AV&C infrastructure via a single USB connection.
- The Google Meet Controller lets you add a Q-SYS user control interface to combine meeting control and room controls on the same touch controller.
- Advanced AEC (acoustic echo cancelation) delivers echo free far-end audio.
- Adjustable noise reduction allows the far end to receive clear audio while minimizing distracting sounds like HVAC, keyboard typing, etc.
- Intrinsic Correction™ loudspeaker processing maximizes sonic performance.

Product	Quantity	
Q-SYS Core 8 Flex processor	1	
Q-SYS NV-32-H network video endpoint	2	
Q-SYS NS-26-1440++ pre-configured network switch	1	
QSC SPA4-100 amplifier	1	
QSC AD-C4T-LP ceiling-mount loudspeaker	2	
QSC AD-S802T column-mount loudspeaker	2	
Q-SYS PTZ-IP 12x72 network camera	2	
Sennheiser TeamConnect Ceiling 2 microphone	1	
Google Series One compute	1
