

Solutions Overview Guide

Meeting Room Audio: Ceiling Loudspeakers

Your Zoom Room meeting should provide an amazing experience for every participant, but these high-value meeting spaces can come in many sizes and may present multiple challenges. QSC Solutions for Zoom Rooms address this by providing the right AV infrastructure (Q-SYS) and the right peripherals (Q-SYS Core 8 Flex, QSC SPA Series amplifiers and the QSC AD-C4T ceiling-mounted loudspeakers, along with the Sennheiser TeamConnect 2 ceiling microphone.)

- Fully networked and manageable AV&C infrastructure via single USB connection.
- Advanced AEC (acoustic echo cancelation) delivers echo free far-end audio.
- Noise reduction reduces the level of steady state noises without affecting the desired speech.
- Intrinsic Correction™ loudspeaker processing maximizes sonic performance.
- Automatic dynamic beam-forming microphone technology, adapts to the respective conditions without reconfiguration.

Product	Quantity	
Q-SYS Core 8 Flex	1	
QSC SPA2-60 power amplifier	1	
QSC AcousticDesign™ Series AD-C4T-LP ceiling-mount loudspeaker	2	
Sennheiser TeamConnect Ceiling 2 microphone	1
